

COVID-19

What we are doing to ensure that The Rock is the safest and WHO standards compliant restaurant in Zanzibar.

- A new layout with decreased seating to ensure at least 1m between tables.
- Hand sanitizer available to all guests on arrival, as well as in restrooms.
- Tables, chairs and table based operating equipment sanitised after each guest has vacated and before new guests take their place.
- Single use per day cutlery, crockery and glassware. Removed from site for sanitisation before re-use.
- Guests served by staff with face masks and gloves.
- New position created for a full time public space and facilities sanitiser.
- All public spaces and facilities sanitised after use and between sittings.

Our staff:

- Temperature screened before each shift.
- 7 point health questionnaire completed pre shift.
- Transported to The Rock in our own sanitised vehicles.
- Face masks and gloves worn by all staff.
- The Rock uses STERI SCOPE, an environmentally friendly, ISO14000 disinfecting solution, Imported to Zanzibar that is particularly effective against the ever difficult to kill microbial spores (bacteria and fungi).
